

SERVICE NOTICE

SUBJECT: External Cargo Compartment Serialization Placard
EFFECTIVITY: 100-0001 through 100-0077 Equipped with the External Cargo Compartment

BACKGROUND

This Service Notice is to make customers aware of the option to install a placard that will uniquely identify the installed external cargo compartment (ECC).

DISCUSSION

In conjunction with the KODIAK 100 *Illustrated Parts Catalog*, Chapter 25 "Equipment Furnishings," Quest is issuing placards that clearly identify the ECC installed on an aircraft, allowing operators and maintenance professionals to easily locate any parts associated to the specific ECC. In order to obtain the corresponding serialized placard for an ECC, identify the ECC serial number as marked on the inside sidewall of the first bay near the forward bulkhead as shown in **Figure 1-1**. Provide all the information indicated in the attached customer response form, and return the form to Quest Customer Care.
