

SERVICE NOTICE

SUBJECT: KODIAK® 100 Airplane Maintenance Manual Format Changes
EFFECTIVITY: AMM Revision 15 and Subsequent Revisions

BACKGROUND

AM902.0 KODIAK® Airplane Maintenance Manual, Revision 15 represents a reorganized version of the KODIAK® Airplane Maintenance Manual. Several significant changes have been implemented that may impact how the manual is used. The manual has been reorganized to follow the Federal Aviation Administration Joint Aircraft System/Component (JASC) Code.

DISCUSSION

Each item in the maintenance manual now has five different categories of information about the subject. They are:

- Description and Operation
- Servicing
- Inspection
- Maintenance Practices
- Troubleshooting

To summarize some of the larger organizational changes:

1. Chapters 1, 4 and 5 were not changed in format, and any content changes were made as part of the normal evolution of the airplane and maintenance manual.
2. Chapters 6, 7, 8, 9, and 10 were merged into a new comprehensive Chapter 6.
3. Chapter 12 was reduced, and content distributed to other chapters to match the JASC code organization.
4. A new Chapter 14 was added to contain hardware related information. The standard torque information now appears in Chapter 14.
5. Several chapters were renamed to comply with the JASC names, but the purpose of each chapter has remained the same (except as noted above).

Please report any errors or problems with the maintenance manual, to Quest Customer Service. Feedback about the maintenance manual, including suggestions for additional content, may also be sent by email to customerservice@questaircraft.com.
